

Tornax S

LET YOUR SURFACE SHINE AGAIN!

- ▶ strong acid foaming detergent
- ▶ very economical
- ▶ long-lasting activity
- ▶ results in healthy & profitable business

CID LINES

The perfectly safe and effective acid cleaner

When a surface is cleaned with water, mineral deposits are left behind, which form a protective shield for micro-organisms. Therefore acid cleaning is essential to remove these deposits. Tornax S is a strong acid foaming detergent for the removal of mineral deposits like lime, iron (rust), calcium, deposits of sugar and proteins. Makes stained surfaces shine again.

Material safety

Concrete, wood, synthetic material, stainless steel, galvanised steel, tiles, aluminium, brass, copper and zinc.

Adapt contact time to acid sensibility (rinse with water).

Application

- concentration: 1-5%
- apply with a foam lance or spraying
- contact time: 10 minutes
- rinse with water under pressure as from 25 bar (also always rinse the foam lance with water)

Cleaning protocol

1. remove the visible dirt
2. pre-rinse the surface
3. apply Tornax S with a foaming lance
4. contact time: 10 min
5. rinse with water
6. let dry
7. apply an effective broad spectrum disinfectant

Advantages

- very good adhesive power
- ideal for the cleaning of tiles
- polishing effect on your material, e.g. let stainless steel shine again
- Tornax S, in rotation with an alkaline cleaning product, will result in clean surfaces, free from organic and inorganic matters.
- Recommended in areas with hard water to remove visible deposits
